Professional Summary

I'm a Senior Software Developer with over 15 years of experience in full-stack development, focusing on .NET technologies, Angular, and cloud solutions. I've worked on building scalable, high-performance applications and have led teams to deliver successful projects.

I'm skilled in ASP.NET, C#, VB.NET, JavaScript, Angular 16, .NET Core, Apache Solr, and SQL Server, always aiming to improve performance and make sure everything runs smoothly.

I love solving problems and enjoy helping junior developers grow in their careers. I've worked across different industries, including enterprise apps, SaaS, and cloud solutions, always delivering software that meets both technical and business goals. I'm excited to keep building innovative software that helps companies succeed.

Technical Skills

Programming Languages: C#, VB.NET, JavaScript (ES5, ES6), TypeScript

Shell Scripting Languages: Bash, Power-Shell

Front-end Frameworks & Libraries: Angular, jQuery, KnockoutJS

Back-end Frameworks & Technologies: ASP.NET MVC, ASP.NET Core MVC, Web API, WCF, LINQ.

Databases: AWS RDS (Relational Database Service), SQL Server 2005-2019, MS Access

Search & Indexing Technologies: Apache Solr, Amazon Cloud Search

Cloud Platforms & Services: AWS CodeCommit, AWS CodeDeploy

Continuous Integration & Deployment (CI/CD): Jenkins, AWS CodePipeline

Other Technologies: Windows Services, Rhino Mocks, Moq, FxCop, SonarQube, AutoMapper, StructureMap, SSO (Single Sign-On) – Ping Identity.

Operating Systems: Windows, Linux

Professional Experience

Senior Analyst - Software Development

Nintec System Limited, Ahmedabad, Gujarat

September 2012 – March 2025

- 12 years and 6 months of experience in software development and maintenance of web-based solutions using Microsoft technologies.
- Participated in all phases of the Software Development Life Cycle (SDLC): requirement analysis, design, documentation, implementation, testing, and deployment.
- Designed and migrated legacy applications to modern tech stacks.
- Led development teams in designing and implementing enterprise-grade SaaS solutions.
- Mentored junior developers, increasing team productivity by 20% through workflow optimization.
- Provided technical mentorship to new joiners, guiding them through complex projects, best coding practices, and problem-solving techniques.

Software Developer

Dotsquares, Jaipur, Rajasthan

October 2010 – November 2012

- Contributed to the development and maintenance of various client-facing web applications.
- Collaborated with cross-functional teams to deliver high-quality software solutions.

Web Developer

Elegance Infosoft Pvt Ltd, Jaipur, Rajasthan

January 2010 – August 2010

- Developed and maintained websites and web applications using front-end and back-end technologies.
- Ensured responsive design and optimized performance for client deliverables.

Software Developer

Infosole IT Solution

January 2009 – December 2009

- Developed custom software solutions for small to mid-sized businesses.

- Engaged in bug fixing, system updates, and documentation.
-

Key Projects

1. IGarage

- **Duration:** 6 months
- **Tech Stack:** ASP.NET, MVC 5, Web API, Signal R, AWS RDS, AWS Code Pipeline.
- **Industry:** Automotive.

Project Overview: IGarage is an online platform designed to connect car owners with repair services, offering users an easy-to-navigate booking system for automotive repairs and diagnostics. The platform also provides a range of additional services like repair history tracking and garage location mapping.

2. Legal Intelligence

- **Duration:** 130 months
- **Tech Stack:** ASP.NET, MVC 5, Web API, SOLR, SQL Server
- **Industry:** Search and content integration.

Project Overview: Developed and managed Legal Intelligence, a legal search engine that provides fast and efficient access to legal and fiscal content. The platform integrates content from 25+ publishers, including major names like Wolters Kluwer and Sdu. Key features include an intelligent search engine with a legal thesaurus, smart ranking algorithms, and up-to-date content. The platform allows users to customize their experience with alerts, dossiers, and collaboration tools. Additionally, it supports modular expansion with features like LI Library for full-text legal book searches and integration with library systems for larger organizations.

3. Content Management System

- **Duration:** 5 months
- **Tech Stack:** Angular 16, APIs
- **Industry:** Search and content integration.

Project Overview: This project involved the complete migration of an existing Content Management System from a legacy tech stack to a modern architecture using Angular 16 and RESTful APIs. The system plays a central role in managing and delivering search-optimized content across platforms. The CMS was built to support multiple modules, including: Publication Titles Management, Publisher Management Package & Access Code Modules. A major focus of the project was enabling users to manage, trace, and track content packages, including verifying whether the packages were successfully processed and indexed in Solr. The revamped system significantly improved User interface responsiveness, Operational efficiency, Content traceability and visibility. It now offers a more streamlined experience for administrators and editors working with large volumes of structured content.

Education & Certifications

Master of Computer Applications (MCA) – International School of Informatics and Management, Jaipur, 2008 (72.25%)

Bachelor of Science (Computer Science) – Jiwaji University, 2001

Soft Skills & Leadership

- Team Leadership & Mentorship
 - Agile & Scrum Methodologies
 - Client Communication & Stakeholder Management
 - Problem-Solving & Performance Optimization
-

Personal Information

- **Date of Birth:** 18th May 1981
- **Languages Known:** Hindi, English
- **Preferred Location:** Anywhere in India
